

CONTENTS

7. CORROSION AND OXIDATION

Ion-beam-assisted coatings for corrosion protection studies.	1
W. Ensinger and G. K. Wolf (Heidelberg, F.R.G.)	
Effect of ion implantation and ion beam mixing and their combined effect on aqueous corrosion resistance	15
W. Tian, W.-P. Cai, J. Li and R. Wu (Wuhan, China)	
Relationship between corrosion properties and structures of titanium-deposited iron bombarded with ions at different target temperatures	21
W. Tian, W.-P. Cai, J. Li and R. Wu (Wuhan, China)	
Phosphorus implantation of 304L stainless steel	27
E. C. Cooney (Storrs, CT, U.S.A.), N. L. Lee, G. B. Fisher (Warren, MI, U.S.A.) and D. I. Potter (Storrs, CT, U.S.A.)	
Corrosion studies in hot acids of titanium modified by refractory metals by ion beam techniques	35
W. Ensinger and G. K. Wolf (Heidelberg, F.R.G.)	
Localized corrosion behavior of aluminum surface alloys produced by ion implantation and ion beam mixing	41
P. M. Natishan, E. McCafferty and G. K. Hubler (Washington, DC, U.S.A.)	
Electrochemical and corrosion behaviour of BN-coated aluminium alloy surfaces	47
L. Fedrizzi, S. Gialanella (Trento, Italy), M. Elena, M. Dapor and L. Guzman (Povo, Italy)	
Electrochemical study of multiple-energy nitrogen-ion-implanted aluminium alloys	53
Y. Massiani, J. P. Crousier (Marseille, France), L. Fedrizzi, S. Gialanella and P. L. Bonora (Trento, Italy)	
Anodic oxidation of nitrogen-implanted aluminium.	59
G. Terwagne, S. Lucas, F. Bodart (Namur, Belgium), G. Sørensen and H. Jensen (Århus, Denmark)	
Activity and surface composition of sputter-deposited Pt/ γ -Al ₂ O ₃ catalysts	65
A. Licciardello, F. Iacona, S. Pignataro (Catania, Italy), A. Parmaliana, F. Frusteri and N. Giordano (Pistunina, Italy)	
Electrocatalytic properties of ion-implanted oxide films	71
L. Elfenthal, T. Patzelt, W. Schultze (Düsseldorf, F.R.G.) and O. Meyer (Karlsruhe, F.R.G.)	
Improved high temperature oxidation behaviour of alloys by ion implantation.	79
M. J. Bennett and A. T. Tuson (Didcot, U.K.)	
Oxidation resistance studies of Ar ⁺ - and N ₂ ⁺ -implanted 304 stainless steel	89
D. C. Kothari, L. Guzman, E. Voltolini, M. Dapor, A. Tomasi (Povo, Italy), S. Gialanella and P. Scardi (Trento, Italy)	
Yttrium ion implantation into austenitic stainless steel: evidence for martensite formation	97
T. Laursen, J. L. Whitton (Kingston, Ont., Canada) and G. Dearnaley (Didcot, U.K.)	
Effect of cerium implantation on the corrosion of Alloy 800H in an S-O-C environment	103
M. F. Stroosnijder, J. F. Norton, V. Guttman (Petten, The Netherlands), M. J. Bennett (Didcot, U.K.) and J. H. W. de Wit (Delft, The Netherlands)	
The effects of ion implantation upon nickel oxidation investigated by secondary ion mass spectrometry	111
P. J. George (Kurukshetra, India), M. J. Bennett, H. E. Bishop and G. Dearnaley (Didcot, U.K.)	
The effect of ion-implanted yttrium on the oxidation of nickel	119
J. M. Hampikian, O. F. Devereux and D. I. Potter (Storrs, CT, U.S.A.)	
Surface oxidation of copper observed by perturbed angular correlation and Rutherford backscattering.	129
M. Uhrmacher, A. Bartos and W. Bolse (Göttingen, F.R.G.)	
Effects of N ₂ ⁺ ion implantation on the oxidation of polycrystalline copper	135
D. C. Kothari, L. Guzman, S. Girardi, A. Tomasi (Povo, Italy), S. Gialanella (Trento, Italy), P. M. Raole and P. D. Prabhawalkar (Bombay, India)	

8. MICROELECTRONIC APPLICATIONS

- The current status of metallization in integrated circuit applications 143
R. J. Holwill (Edinburgh, U.K.)
- Properties of oxide and nitride layers in aluminium produced by high dose ion implantation. 153
S. Ohira (Ihara-gun, Japan) and M. Iwaki (Wako, Japan)
- Argon ion beam effects upon photoemissive thin films 161
P. Dolizy and F. Grolière (Limeil Breannes, France)

9. INDUSTRIAL APPLICATIONS AND EQUIPMENT

- Ion beam processing for industrial applications. 167
J. K. Hirvonen (Bedford, MA, U.S.A.)
- Improvement in friction and wear of hard chromium layers by ion implantation. 177
W. Lohmann (Obernburg, F.R.G.) and J. G. P. Van Valkenhoef (Hengelo Ov, The Netherlands)
- Ion implantation in WC-Co: analysis of treated surfaces and testing of industrial tools 183
L. Guzman, L. Ciaghi, F. Giacomozzi, E. Voltolini (Povo, Italy), A. Peacock, G. Dearnaley and P. Gardner (Didcot, U.K.)
- A universal high-current implanter for surface modification of materials 193
B. R. Nielsen, P. Abrahamsen and S. Eriksen (Jyllinge, Denmark)
- Plasma source ion implantation: a new approach to ion beam modification of materials 197
J. R. Conrad (Madison, WI, U.S.A.)
- A newly developed linear ion implanter for industrial applications 205
F. J. Körber, W. D. Münz, H. Ranke, St. Reineck (Hanau, F.R.G.), H. J. Füsser and H. Oechsner (Kaiserslautern, F.R.G.)
- High-current metal-ion beams with energies up to 45 keV u^{-1} 209
H. Emig, D. M. Rück, P. Spädtke, B. H. Wolf (Darmstadt, F.R.G.) and B. Torp (Jyllinge, Denmark)
- High current density, broad beam ion implantation. 215
P. J. Wilbur, R. Wei and W. S. Sampath (Fort Collins, CO, U.S.A.)
- Improvement of a microwave ion source for surface modification 221
N. Sakudo, K. Tokiguchi, T. Seki (Hitachi-shi, Japan), H. Koike (Katsuta-shi, Japan) and M. Iwaki (Wako, Japan)
